

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. ## STATE DIRECTOR'S REPORT.

---

*To the Governor of the State of New Jersey :*

SIR—In accordance with the provisions of the law, I have the honor to transmit herewith my annual report as State Director of “The United New Jersey Railroad and Canal Company” for the year 1891.

As in previous years, this report will be found to contain an account of the number of miles in operation, together with the receipts and disbursements of the different divisions and branches leased by the Pennsylvania Railroad.

For an account of the moneys received by the State, I respectfully refer you to the report of the State Treasurer, where the same will be found properly itemized.

The property of this corporation is in the best of condition as well as its finances.

The Board of Directors give their time and attention to the management, which up to date is excellent and to be commended.

Respectfully,

E. F. C. YOUNG,

State Director.

March 3d.—A. E. Loushay, fireman, age twenty-five, while fixing the fire on engine 106, J. H. Mallon, engineer, at 5:45 P. M., at Hawthorne Heights, a big lump of coal rolled down from tender and caught his right thumb, badly bruising it.

April 3d.—Chas. Jennings, conductor, age thirty-four, while in the cupola of caboose on train 79, engine 717, E. Van Inwegen, engineer, at 12:30 A. M., at Allendale, he lost his balance and fell to the floor, severely spraining his left wrist.

May 2d.—John H. Mallen, engineer, age thirty-four, on engine 559, S. D. Wheeler, conductor, when at Paterson, at 5:15 A. M., some cars ran out of siding and into his engine; he sustained a fracture of left leg below the knee. The accident was caused by carelessness of Brakeman T. Smith in releasing the brakes on the cars, and he has been dismissed.

June 21st.—Richard De Graw, age thirty, while intoxicated, was sitting on the end of a tie at West Paterson, at 9:55 A. M., and was struck by train 1, engine 326, M. Murphy, conductor ; M. Shafer, engineer ; he received injuries from which he died the same day.

July 30th.—Wm. George, trackman, age twenty-three, while working on track near Ridgewood, at 9:53 A. M., he was struck and killed by train 28, engine 321, A. McNeal, conductor ; J. Sullivan, engineer. The foreman told him and shouted to him to get out of the way, but he paid no attention.

August 10th.—Michael Brogan, track foreman, age forty, while sitting asleep on the end of a tie near Lafayette street, Paterson, was struck by yard engine 445, G. W. Van Houten, engineer, bruising and spraining his back. He was not on duty at the time.

August 21st.—Peter Flanagan, age eighteen, and Ernst Malone, age eighteen, attempted to cross the track at Fair street, Paterson, at 10:25 P. M., in a wagon ; the gateman was lowering the gates at the time, and shouted to them to keep back, but they paid no attention, and drove on the crossing right in front of train 8, engine 31, D. D. Shultz, conductor ; T. Degan, engineer. The wagon was struck, and the two men thrown out. Flanagan received injuries from which he died the same day, and Malone had his right hip dislocated, and was generally bruised about the body.

August 23d.—Child named Quigg, age nine months, was sitting on its mother's lap, with right hand in the open window of coach on train 604, engine 309, T. Quackenbush, conductor ; C. Romaine, engineer. When train was passing Paterson the window fell down, catching the child's right hand, badly bruising it.

September 2d.—Wm. H. Ziesse, brakeman, age nineteen, while making a coupling in train 314, engine 108, F. A. Snook, conductor ; J. Hopper, engineer, at 8:55 A. M., at Hawthorne Heights, had right hand caught and slightly bruised. He was not using coupling stick.

September 2d.—Ernst Scheffendecker, aged nine, passed behind a car in the yard at West Paterson, at 12:40 P. M., when extra train, engine 530, J. M. Snook, conductor ; B. Williams, engineer, backed

train against this car, and the boy was knocked down and had right leg and right arm run over and badly crushed.

October 7th.—Margaret Mulholland, age sixty, while picking coal along the track at Ridgewood Junction, at 3:45 P. M., was struck and instantly killed by train 5, engine 321, A. Slade, conductor; J. Sullivan, engineer. She was deaf and paid no attention to the warning signals from the engine.

October 9th.—John Tibbitts, firemen, age forty-three; James Pawling, brakeman, age twenty-two; Frank Bloker, engineer, age forty-one; extra 357 east, J. W. Corwin, conductor; J. O'Brien, engineer, when near Ridgewood, at 3:55 A. M., a brake-beam dropped down, derailing several cars; before a flag could be sent out the wreck was run into by Paterson yard engine 408, J. Collins, conductor; F. Bloker, engineer, on way to Waldwick with company's employees. Tibbitts had left leg broken and was badly scalded; he died from his injuries the same day. Pawling and Bloker received some very slight bruises.

October 13th.—John Oakley, age thirty-five, as train 135, engine 88, C. Whittaker, conductor; T. Fitzsimmons, engineer, was approaching Paterson station, at 8:27 P. M., he attempted to jump off before train stopped; he slipped and fell under wheels, and was run over and received injuries from which he died on the 15th, two days later.

October 25th.—Chas. H. White, brakeman, age twenty-two, while pulling a pin in train, second section, 83, engine 738, William Peck, conductor; J. Duryea, engineer, at 7:35 A. M., at Ridgewood, had right hand caught and badly bruised.
